

Hi Nina,

I think you did a great job with the overall mockup! I especially like the image you chose at the top because I think it embodies the overall aesthetic I was going for. I also really like the typeface you chose; I think it pairs well with the serif typeface you have at the header.

I just have some small suggestions:

- For the different titles (i.e Early Life, Professional Career, etc..) it would be great if you could use the serif typeface you have at the header where you wrote "Tiger Woods"
- I really like the icon you chose with the ball on the tee but it'd be great if you could make the ball or the tee a different color because it's hard to tell what it is when you first look at it.
- For the Honors and Achievements section, would it be possible to have the stats in some sort of chart format rather than a list? I think putting it in a chart or gridded format will be more visually appealing.
- Also I would like there to be more of a dark green color throughout the site. Maybe making the titles/nav bar this green color? Or for the achievements section making the things you have in bold this green color? Or maybe having the background color of the website be green?

Overall great job and thanks!
